Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the

application:

Listing of Claims:

1. (Currently Amended) A handheld computer portable electronic

device comprising:

a processor module comprising a processor and a display;

a sliding display cover moveably coupled to said processor module;

a sensing device coupled to said processor module and to said sliding

display cover for providing geometric information indicating a relative position of

said display with respect to an edge of said sliding display cover, wherein said

geometric information is provided for a plurality of positions; and,

a device driver for performing an action in response to a signal, wherein

said action is selected based upon the position of said edge relative to said

display.

2. (Currently Amended) The handheld computer portable electronic

device of Claim 1, wherein said action is a visual configuration of said display.

3. (Currently Amended) The handheld computer portable electronic

device of Claim 1, further comprising a wireless transmitter, and wherein said

PAI M-3778.SG 2 Art Unit: 2628 Examiner: Javid A. Amini

US App. No.: 10/006,538

action is an initiation of communication with another device using said wireless transmitter.

4. (Currently Amended) The handheld computer portable electronic device of Claim 1, further comprising a wireless transmitter, and wherein said action is an initiation of communication with an external device, using said wireless transmitter.

5. (Currently Amended) The handheld-computer portable electronic device of Claim 1, wherein said sensing device is a non-contact sensor device.

6. (Currently Amended) The handheld computer portable electronic device of Claim 1, wherein said display is a touch panel display forming a part of said sensing device.

7. (Currently Amended) The handheld computer portable electronic device of Claim 1, wherein said sliding display cover comprises an input device coupled to said processor module.

8. (Original) A method of selecting an option in an electronic device comprising a processor module and a sliding cover, said method comprising:

a) displaying information on a display screen of said processor module;

PALM-3778.SG 3 US App. No.: 10/006,538 b) positioning an edge of said sliding cover adjacent to a portion of said

information on said display screen by sliding said sliding cover relative to said

display screen;

c) activating a selection device of said electronic device; and

d) invoking an action of said electronic device related to said portion of

said information.

9. (Original) A method as described in Claim 8 further comprising

generating a position signal corresponding to a position of said sliding cover

relative to said display screen.

10. (Previously Presented) A method as described in Claim 8 wherein

said action is an execution of an application program.

11. (Previously Presented) A method as described in Claim 8 wherein

said action is a display of related additional information to said portion of said

information.

12. (Original) A method as described in Claim 8 wherein said selection

device is a key.

Art Unit: 2628

PALM-3778.SG US App. No.: 10/006,538 13. (Original) A method as described in Claim 8 wherein said sliding cover comprises a keyboard.

14. (Original) A method as described in Claim 8 wherein said sliding cover further comprises a microphone.

15. (Original) A method as described in Claim 8 wherein said sliding cover further comprises a speaker.

16. (Previously Presented) A computer readable medium containing executable instructions which, when executed in a handheld computer comprising a display, causes the handheld computer to configure a visual output of the display, comprising instructions for:

sensing a relative position of a sliding cover and a processor module, wherein said relative position is a partially closed position;

generating said visual output on said display, wherein said visual output comprises visual objects arranged to be viewable in response to said relative position.

17. (Original) The computer readable medium of Claim 16, further comprising instructions for initiating an application by said processor module.

Art Unit: 2628 Examiner: Javid A. Amini 18. (Original) The computer readable medium of Claim 16, further

comprising instructions for initiating communication with an external device.

19. (Previously Presented) The computer readable medium of Claim

16, further comprising instructions for altering said visual output in response to a

signal.

20. (Previously Presented) The computer readable medium of Claim

16, wherein said instructions are for a rearrangement of a previously displayed

visual object.

21-24. (Canceled)
